

2016 Congestion Management Process – Monitoring Report

August 1, 2017

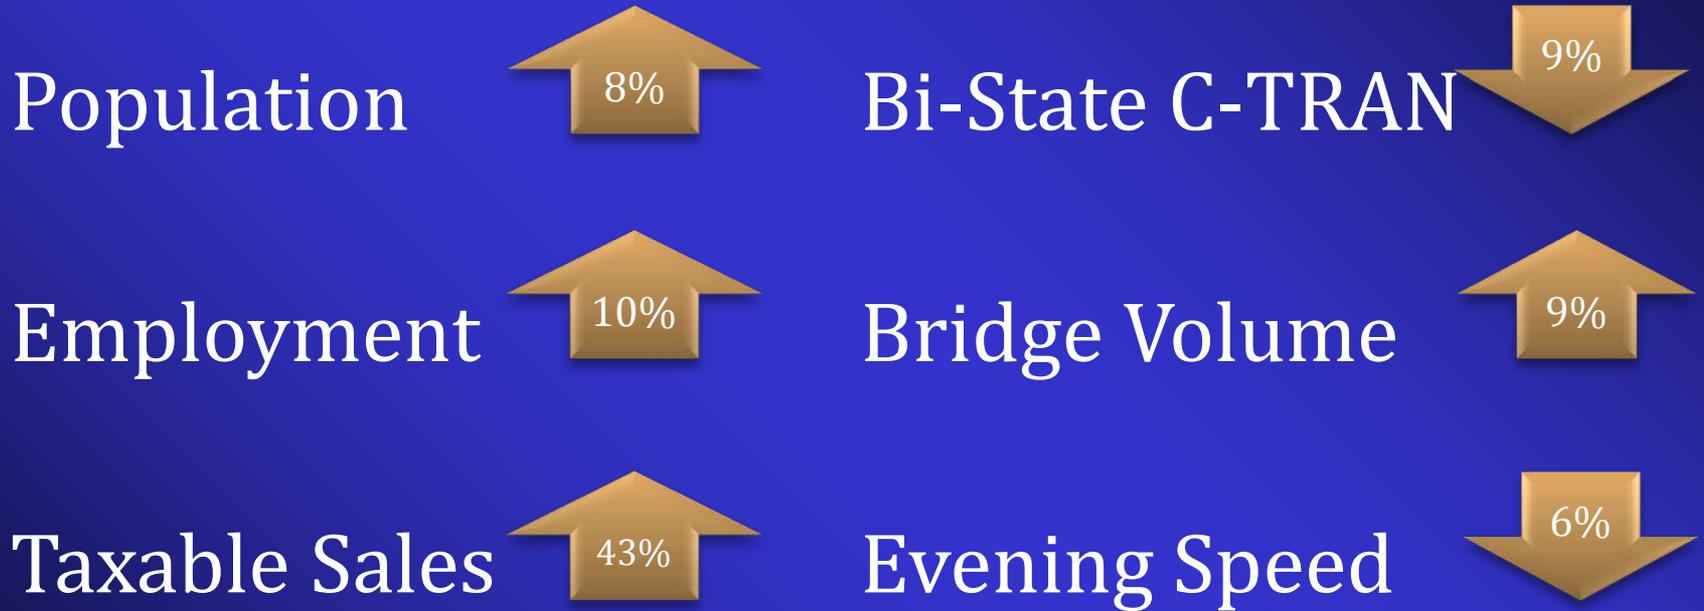

CMP Requirement

- ◆ Federal Planning Requirement
 - ◆ Annual Assessment of transportation system operating conditions
 - ◆ Informs transportation investment
 - ◆ Reports on effectiveness of strategies

CMP Schedule

- ◆ May 3rd – Initial Data
- ◆ June 7th – Summary Report
- ◆ August 1st – Action: 2016 CMP Report

Regional Summary: 2011 vs 2016

Key Finding

- ◆ Implementation of RTP with focus on operational & bottleneck improvements can address congestion.
- ◆ I-5 Strategic Corridor. Demand will continue to grow in this critical corridor, and choke points need to be addressed.
- ◆ In the short-term, the region needs to study and implement freeway management strategies.

Key Strategies

- ◆ TSMO & TDM Strategies
- ◆ Capacity selectively added
- ◆ Implement I-5 Bridge Replacement
- ◆ Need to assess and implement strategies (ex. TSMO, TDM) to manage existing I-5 corridor, prior to I-5 bridge replacement.

2016 CMP-Monitoring Report Resolution 08-17-12

Action on this resolution will include endorsement of the Congestion Management Process 2016 Monitoring Report and its key findings and strategies.
