I-205/I-5 – Urban Interstate

Daily Traffic Volume: SR 14 – 70,000

I-205 – 120,000

I-5 – 128,000

Project Map

Project Description

This project installed CCTV Cameras, wireless antennas, traffic data stations, and VMS signs within the greater Vancouver urban area to provide traveler information, incident management, and corridor travel times.

Project Benefits

- Provide traveler information communicated to roadway users via the new VMS sign and WSDOT Website.
- Provide traffic data (counts and travel times).
- Provide additional visual image of traffic (CCTV Camera).
- Improved incident notification and management.

Project Funding
