

City Safety Plans

RTC

Project Completed: March 2022

Project Information

RTC funding: \$100,000 in STBG Funds

Total Project Cost: \$115,600

Project Type: Multi-Agency Planning

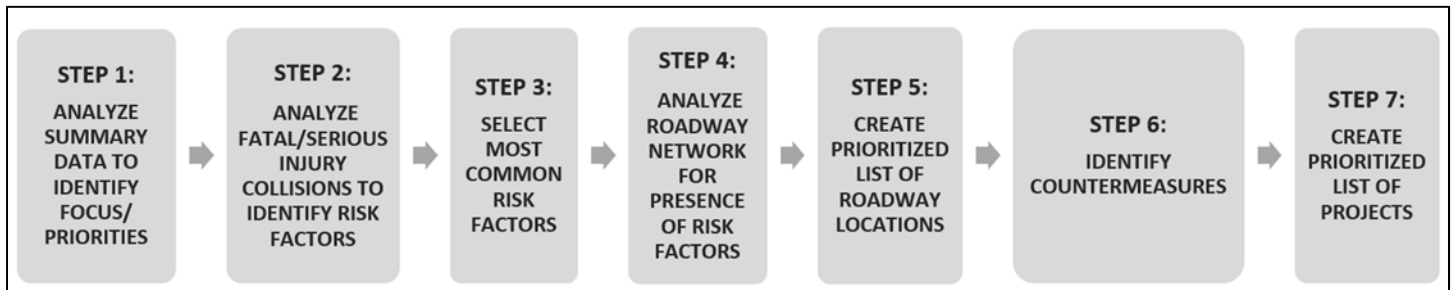

Study Area: Cities of Battle Ground, Camas, La Center, Ridgefield, and Washougal.

Project Description

RTC and the cities of Battle Ground, Camas, La Center, Ridgefield, and Washougal are committed to reducing the number and severity of roadway collisions on the transportation system. The need to develop Local Road Safety Plans was identified as a way to help these cities improve safety on the transportation system.

The purpose of City Safety Plans is to analyze crash data within each city in order to effectively identify trends, contributing factors, associated risk factors, and deficiencies present in the city's road network. Following this approach allows for the effective identification of appropriate, low-cost countermeasures to be implemented for the purpose of crash reduction. The process followed was consistent with WSDOT's guidelines from the City Safety Program.

Project Benefits

The Local Road Safety Plan is a tool for reducing roadway fatalities, injuries, and crashes. This Plan can help cities create a prioritized list of safety improvements. The Plan is also a proactive risk management technique to demonstrate an agency's responsiveness to safety needs.

The development of a City Safety Plans, allows each city to be eligible for federal Highway Safety Improvement grants through Washington State Department of Transportation (WSDOT).

Project Funding

Phase	Year	Federal Funds	Other Funds	Total
Planning	2021-2022	\$100,000	\$15,600	\$115,600
Total		\$100,000	\$15,600	\$115,600
