Clark County Transportation Alliance  
2015 - 2016 Washington State Legislative Policy Statement  
Transportation Needs and Solutions  

A CALL TO ACTION

Clark County is facing unprecedented transportation infrastructure revenue challenges.  
• Local and state transportation safety and mobility needs continue to grow for both new facilities and for the maintenance of the transportation system.  
• Critical transit and rail/freight improvements are needed.  

Transportation infrastructure is directly related to economic recovery, community development and overall quality of life in southwest Washington. Meeting our transportation needs will require a unified effort by public and private sector leaders and strong, effective leadership by our local legislative delegation. Organizations on the back of this statement ask that our legislators support the following transportation priorities in the 2015-16 legislative sessions.

New Revenue Package

A new comprehensive revenue package, with direct distributions to local governments for preservation and maintenance, is needed now. New and enhanced local transportation funding options are needed, as well as, restoration and the maintenance of the Public Work Trust Fund. Recent work of the Connecting Washington Task Force and our own RTC has documented a growing multi-billion dollar transportation infrastructure deficit at the state and regional level in order to meet current and future unmet needs. We respectfully suggest that action take place this legislative session.

Under existing regulatory procedures, transportation projects take too long to build. Accelerated project permitting with regulatory streamlining would move projects faster and stretch transportation funding.

And, protect existing funding: Protect remaining TPA and Nickel funding for local projects.

Regionally Critical Projects

Critical Clark County and SW Washington projects need to be included in any project list associated with any new transportation revenue package. We urge legislators to rely on RTC for direction on regionally validated local and state system project priorities, beginning with:  
  o Vancouver Interstate 5/Mill Plain Interchange (capacity improvements)  
  o Vancouver SR 501 (Mill Plain) Interstate 5 to Port of Vancouver (capacity and oversize load improvements)  
  o Vancouver SR 14/I-205 to 164th Avenue Widening (add auxiliary lanes)  
  o I-205: SR-500 to Padden Expressway (add auxiliary lanes)  
  o Vancouver SR 500 Intersections at 42nd Avenue and 54th Avenue (capacity and safety improvements)  
  o Camas Washougal SR 14 Widening/West Slough Project and Phase 2 Widening SE 6th - 32nd St./Stiles Rd. Project  
  o Clark County NE 10th Avenue from 149th to 164th St./Whipple Creek project (new bridge and capacity improvements)  
  o Clark County Interstate 5/179th Street Interchange (capacity improvements)  
  o Battle Ground SR 502/SR 503 Congestion Relief Project (capacity and circulation improvements)  
  o Ridgefield Pioneer Street Rail Overpass (new bridge)

Public Transit

C-TRAN is an essential component of Clark County’s transportation system. The Clark County Transportation Alliance requests that the Legislature support and enhance funding for public transportation as a critical mode in the metropolitan and statewide transportation systems, including Regional Mobility Grants and other targeted investment programs.

Ports and Freight

Our ports and rail system play a vital role in the region’s economy. Infrastructure investment in our freight systems brings jobs and has direct economic benefits to the region. We ask our legislators to support funding for freight projects: Upgrades to Clark County Chelatchie Prairie Railroad; SR14 improvements at and near Port of Camas-Washougal; and Port of Ridgefield’s Pioneer Street Railroad Overpass project.
